PROFESSIONAL SUMMARY

- Extensive 2.5+ years of industry experience developing enterprise-grade Financial Technology and Cyber Fraud Risk solutions using Java and Spring, with specialized expertise in designing and implementing anti-money laundering (AML) systems.
- Proficient in designing and implementing RESTful APIs and microservices, leveraging relational databases (MySQL, MSSQL server, PostgreSQL) and ORM frameworks such as Hibernate/JPA, with a strong focus on scalability, performance, and maintainability. .
- Strong understanding of Object-Oriented Programming (OOP) principles, design patterns and clean coding practices.
- Experienced in debugging applications, fixing production issues, and providing production support, including root cause analysis and timely resolution of defects.
- Exposure to cloud platforms (AWS, Firestore) and containerization tools (Docker, Kubernetes) for application deployment.
- Experienced in version control systems (Git, GitHub, SVN) and CI/CD pipelines using tools like Jenkins and Maven/Gradle.
- Familiarity with frontend technologies including HTML, CSS, JavaScript and Angular.
- Proven ability to translate business requirements into technical solutions and successfully deliver Agile-based projects within sprints.
- Quick learner with a track record of understanding and implementing new technologies effectively to meet changing business needs.

TECHNICAL SKILLS

Languages: Java(Java 8/11/17/21), Angular

Frameworks: Spring Boot, Spring Batch, Spring Security, Hibernate/JPA

Databases: SQL Server, MySQL

Messaging: Apache Kafka

Build and Dependency Tools: Maven, Gradle

Developer Tools: Eclipse, IntelliJ, Postman, SVN, Git, Google Cloud Platform

DevOps Containerization: Docker, Kubernetes, Jenkins

Cloud Platforms: Amazon Web Services (AWS) – EC2, S3, RDS, Lambda, CloudWatch

EXPERIENCE

Mindefy Technologies Pvt Ltd

Software Engineer

Project 1: Anti Money Laundering Platform(KrungThai Bank, Thailand) April 2025 – Present

Java, Spring Boot, Spring Security, SQL, AWS Lambda, AWS S3

- Developed an automated AML (Anti-Money Laundering) reporting platform using Java and Spring Framework to detect and analyze fraudulent customer activities from uploaded transaction data.
- Implemented dynamic template selection logic in the service layer to automatically generate AMLO reports based on fraud severity and classification.
- Integrated secure data handling, rule-based processing using Hibernate and Java libraries, improving fraud detection accuracy and ensuring AML compliance.
- Coordinated with peers in the team for clarity on the requirements.

Project2: Insider Employee Fraud (KrungSri, Thailand)

Sept. 2024 – March 2025

Java, Spring Batch, Hibernate, Liquibase and MS SQL Server.

- Developed and implemented a fraud detection module to identify suspicious employee transactions using Java, Spring, and Hibernate, improving detection accuracy and reducing manual review time.
- Integrated business rules and anomaly detection logic within the service layer to flag high-risk activities such as unauthorized account access and unusual transaction patterns.

- Collaborated with cross-functional teams to integrate the fraud detection system with internal audit dashboards, ensuring real-time monitoring and alert notifications through REST APIs.

Project3: Cyber Fraud Risk Management(Export-Import Bank of Thailand) Jan 2024 – Aug 2024

Java, REST API, Hibernate and MS SQL Server.

- Developed and implemented Spring Batch jobs to automate daily reconciliation of transactions between internal banking systems, ensuring accuracy and data consistency across large volumes of records.
- Designed robust batch steps for reading, processing, and writing high-volume financial data using FlatFileItemReader, ItemProcessor and JdbcBatchItemWriter, reducing manual verification efforts.
- Improved system reliability by implementing scheduling, error handling, and retry mechanisms.

PERSONAL PROJECTS

Audio Transcriber Using Spring AI

Spring Boot, Spring AI, OpenAI, ReactJS

- Developed a web-based audio transcription application using Spring Boot with Spring AI on the backend and React on the frontend.
- The application allows users to upload audio files through a simple UI and converts speech into text using AI-powered transcription.

EDUCATION

Master of Computer Applications (MCA)

May 2022 - May 2024

Rajiv Gandhi Prodyogiki Vishwavidyalay — CGPA: 8.2

Bachelor of Science in Computer Science

Aug 2017 - Oct 2020

Govt Holkar Science College, Indore — Percentage: 74.84%

Senior Secondary (12th), Indore – 89.9%

June 2017

Indore

Higher Secondary (10th), Indore – 90.1%

June 2015

Indore

CERTIFICATION

Oracle Certified Associate, Java SE 8 Programmer

Issued by Oracle — June 2026

ACHIEVEMENTS

- * 25k cash prize for meritorious performance by the Chief Minister of Madhya Pradesh in 2017.
- * Served as Science Secretary during 2016–2017, leading the Physics and Chemistry teams in organizing the school Science Exhibition and coordinating project development, presentations, and overall execution.
- * Represented the organization in the ISA (Indore Software Association) Cricket Tournament 2024.
